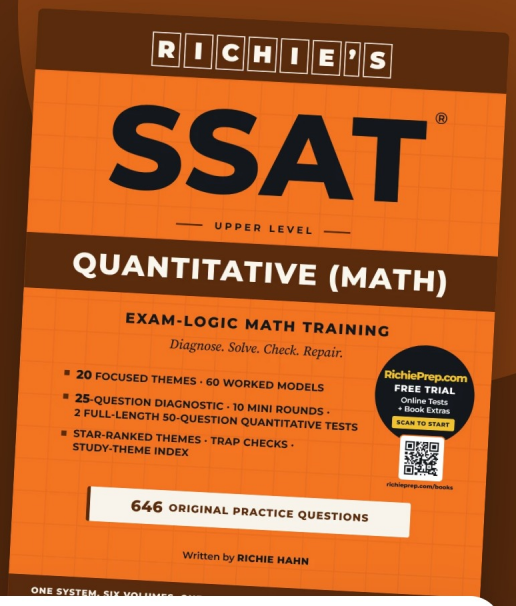
Quantitative (Math)

EXAM-LOGIC MATH TRAINING

Train the decision behind each problem.

You get better at math on this test by seeing the decision a problem is asking you to make — and taking the shortest safe route without skipping the check that protects the point. Twenty Themes, sixty



20 FOCUSED THEMES

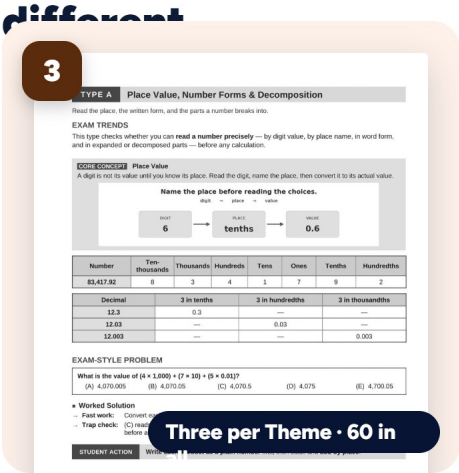
646 ORIGINAL PRACTICE QUESTIONS

60 WORKED MODELS

1 + 10 + 2 DIAGNOSTIC · ROUNDS · TESTS

Three corners that make this book different

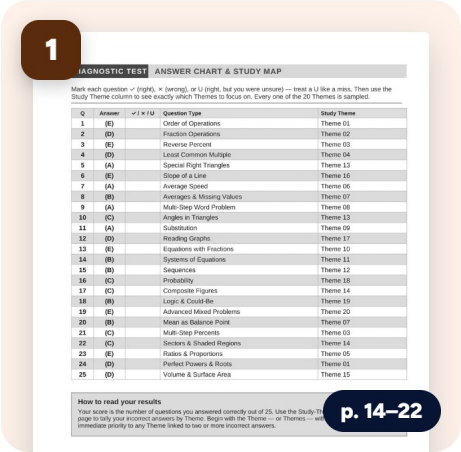
REAL PAGES



Type A · B · C pages — Exam-Style Problem + Worked Solution

Each type page: Exam Trends, a Core Concept, one Exam-Style Problem, a Worked Solution that pairs Fast Work with a Trap Check, and a one-line

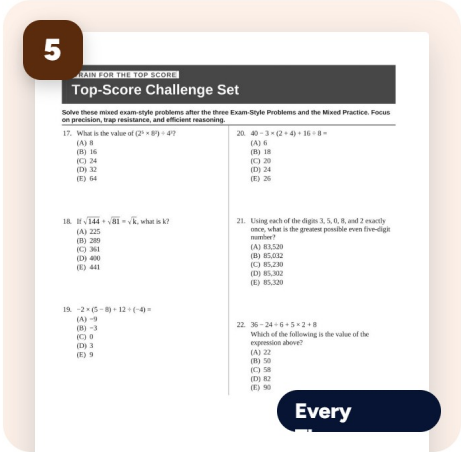
→ **The shortcut — and the mistake that shortcut invites — learned together, sixty times.**



Diagnostic Test + Study-Theme Index

Twenty-five questions that sample every Theme, then an index that maps each question to its Theme and reads your results as a study order.

→ **A raw score becomes a plan: start with your weakest Theme, not with Theme 01.**



Train for the Top Score · Challenge Set

Harder mixed exam-style problems that reach the hardest level the test asks for — precision, resistance to traps, and the shortest sound route.

→ **The top of the ladder, after control is built — never before.**

THE LEARNING FLOW

STEP 1 **Diagnostic** → STEP 2 **20 Theme Cycles** → STEP 3 **10 Mini Rounds** → STEP 4 **2 Quant Tests** → STEP 5 **Targeted Repair**

Every corner, and why it is there

1 **Diagnostic Test + Study-Theme Index**
A raw score becomes a plan: start with your weakest Theme, not wi...
